

Why you need IMD (Ionic Mineral Drops)

Due to increasing human population there has been an increase in the amount of pollutants found in the environment, and water must now be 'purified' through chemical means in order for it to be safe for us to drink. Because this polluted water can cause digestive disorder, diarrhea, skin diseases, jaundice, even cancer also. Still, all of the chemicals and pollutants are not removed and so often we use the process of distillation and reverse osmosis (RO System) to purify the water further. However, as well as removing contaminants, these processes also remove the minerals that are naturally found in water and which are very essential for our general health and well being.

Because when pollutants, contaminants, chemicals, additives and toxins are removed from water by distillation or reverse osmosis (RO), the water becomes purified to an unnatural state, where even beneficial minerals are removed. When this purified, mineral deficient water enters the body, it balances itself with the bodily fluids by absorbing minerals from cells. This not only depletes minerals that are needed by the cells to function properly, by some of the mineralized water is excreted, the minerals leaving the body, thus depleting it further.

One of the primary reasons R.O. water is unhealthy is because removing the minerals makes the water acidic (often well below 7.0 pH). Drinking acidic water will not help maintain a healthy pH balance in the blood, which should be slightly alkaline.

This mineral deficiency leads to serious diseases like bone & muscular pains, muscle spasm, cancer, heart problem, diabetes, high or low blood pressure, and skin diseases, neuromuscular disorders, degenerative diseases, cancer, even can cause death.

But with the help of Ionic Mineral Drops (IMD), you can fulfill mineral deficiency in the body. It is 100% natural & free from any sort of side effects. IMD contains very essential concentrated ionic mineral drops so when we mix it in drinking water as per dosage chart, water gets mineralized & its daily usage twice a day

will furnish all the body requirements of minerals. So this product can efficiently protect you from this life threatening diseases. Earth water naturally contains 90 minerals where Ionic Minerals Drops contains upto 80 concentrated ionic trace minerals.

Also to be noted this product is very economical whereas you are investing Rs. 15 to 20 per mineral water bottle, IMD will cost you 10-12 per day which is very very cheaper & gives you complete minerals which enhance more than 300 biochemical reactions in the body & protects you from these dreadful diseases.

The people who are already suffering from these diseases can also experience the marvelous effect of IMD in their body so to maintain healthy & happy life switch to IMD. With the intake of 5-5 drops morning & evening, you can fight against dangerous minerals deficient problems. Stay healthy with IMD!
